

TeleMedVet - Account Creation

Note: If you had a user account in the previous TeleMedVet system, please note that you will still need to create a user account in the new system.

User login credentials will be the email address you select for your account during registration. Future communications will be sent to this address. You may choose to use one primary email for your clinic.

Accessing TeleMedVet:

- 1) Navigate to TeleMedVet - <https://telemedvet.ambrahealth.com/>
- 2) If you have yet to setup your user account in the new system (this includes those who were active in the old system), click "Register here"
 - a) Fill out your information (see example)
 - b) Click "Register"
 - i) This will automatically submit a request to join TeleMedVet (note: you will not see your clinic cases on the website until your account is approved)
- 3) Send images/DICOMS to TeleMedVet. If you have already been successfully sending cases to TeleMedVet in the past, no further configuration is necessary. If you are a new clinic to TeleMedVet, please use the DICOM Transfers guide to connect your modality with the TeleMedVet DICOM server and send a test study.

The screenshot shows a registration form with the following fields and options:

- * First name:
- * Last name:
- * Email Address:
- * Password:
- * Confirm password:
8 characters or longer, containing 2 numbers and 2 letters
- Clinic or Hospital Name:
- I confirm that my practice is in the state of North Carolina
- * I accept the Terms of Use
- * I accept the Privacy Policy
- * I accept the Indications for Use
-

Once step 2 is complete, your account creation request will be reviewed, and you will receive an email confirming when your account is ready to use. Please note that the confirmation email may take up to 2 business hours as the request must be documented, and the account must be configured before use. Business hours are Monday to Friday 8 am to 5 pm.
